5 Since When?

1 Listen and Discuss

1. How long do you think these inventions have been around?
2. How have these things changed people's lives?
3. Which of them can't you live without?

INVENTIONS

Many inventions aren't as old as you think. The following inventions are part of people's everyday lives, but some haven't been around for all that long. Read about their history. Does any of the information surprise you?

PRINTERS

Mass printing has been around since Johannes Gutenberg invented movable type and the printing press in 1440 in Germany. Nowadays, small, portable, high-tech printers can be found in offices and homes everywhere.

CAMERAS

Digital photography hasn't been around for that many years. In 1975, Steven Sasson, an engineer at Eastman Kodak, captured a black-and-white image on a digital cassette tape at a resolution of 0.01 megapixels. Before that, cameras used rolls of film to produce a photograph. George Eastman introduced rolls of film to the public in 1888 for use in his box camera.

COMPUTERS

Computers have changed the lives of so many people. The IBM 701 computer produced in 1953 was huge, slow, and took up an entire room. It was the first computer that was successfully sold to businesses. Smaller PCs came into widespread use in the 1980s. Over the last few years, laptop computers have become smaller, faster, and lighter, and they contain a greater number of features.

TELEVISIONS

Television has been around for a long time. The television set has become a common household device. It first became commercially available in the late 1930s, and black-and-white TVs became widespread in homes in the 1960s. Nowadays, we have digital color TVs and even mirrors that are also TV screens.

STOVES AND OVENS

The first successful gas stove appeared in 1826, and the first electric stove in 1891. The microwave oven was invented by accident in 1946, when engineer Percy Spencer realized that microwaves could heat and cook foods faster than conventional ovens. The first microwave oven for use in homes was produced in 1967.

CELL PHONES

Portable cellular phones first appeared in the 1970s. The early model was called “the brick.” It weighed 2 pounds (907 grams), offered just a half hour of talk time for every recharge, and sold for \$3,995. Even though it was clumsy and expensive, consumers lined up by the hundreds to buy the first cellular phones as soon as they hit the market. Since then, phones have gotten smaller and much lighter, and they have become a necessary part of everyday life.

9 Reading

Before Reading

1. What do you know about early film production?
2. What do you know about special effects?

A HISTORY OF SPECIAL EFFECTS

- 1 Audiences have been fascinated by the moving images in films ever since the Lumière brothers first showed short films in a café in Paris on December 28, 1895. **That** day, the audience screamed when a train
- 5 on the film came straight toward them. Since **then**, filmmakers have used various techniques to amaze viewers. **These** techniques form the art of special effects—and create the visual illusions on the screen.

- One of the first special effects used in motion pictures
- 10 was discovered by accident. While filming in the streets of Paris in 1896, Georges Méliès's camera stopped and started again. When he viewed the film later, he found that the "stop trick" had caused a bus to turn into a carriage and pedestrians to disappear or change into different people. Because the film
- 15 sequence had been interrupted, the picture seemed to mysteriously change before his eyes. Since **then**, filmmakers have used tricks like **this** to make people see things that didn't happen in real life.

- Filmmakers today still use other old techniques such as miniatures and the animation of small-scale models. One of the most famous special effects in film history was the title character in *King Kong*, made in 1933. The huge gorilla on top of the Empire State Building was actually only 18 inches (45 centimeters)
- 20 high. The film contained many revolutionary technical innovations for **its** time.

Another classic was *Star Wars* (1977) and its sequels, created by George Lucas. His ideas for the imagery and action scenes were so fantastic that the special effects crew often had to invent new techniques to accomplish them. **They** made many improvements in effects technology and developed a computer-controlled camera to create scenes with more realistic motion.

- 25 Nowadays, digital technology has given special effects a totally new dimension. Films such as *Jurassic Park*, *Toy Story*, *Transformers*, and *Pirates of the Caribbean* have become references in the art of visual effects. Imaginary
- 30 situations and characters that only existed in books and comic books, such as *Spiderman*, have also been made to look realistic on television thanks to computer-generated images.

The art of filmmaking never stops. What amazing visual effects will filmmakers use in the future? You'll see **them** on the screen soon!

Writing Corner

For better cohesion in writing:

- Use subject, object, and possessive pronouns or possessive adjectives.
I collect stamps. I keep **them** in albums according to **their** country and date.
- Use demonstrative pronouns and adverbs like: *this, that, these, those* or *then, there*.
I started collecting stamps five years ago. Since **then**, I've collected over 2,000 of them.
This is the oldest stamp that I have. **Those** are from Argentina.
- Use relative pronouns like: *who, that, which*.
The man **who** gave me this stamp said it is very old. It was on a letter **that** he received when he was a young boy.

B. Read the paragraphs. Circle the pronouns. What or who do they refer to?

I have one possession that is really important to me. This is my bike, which is special for many reasons.

I've had my bike for about two years. When I first saw it in the window of the sports shop, I just knew that I had to have it. My parents agreed that I could buy it, but they said I had to pay for it myself. That's one reason why it's so special to me. I'd never bought anything so expensive before. Since then, my bike and I go everywhere together. I ride it to school, to the park, to football practice, and sometimes I just ride it without any destination in mind.

I always try to keep my bike in good condition, but sometimes it breaks down. I've learned to repair a flat tire. Once, the chain came loose, so I learned how to fix that, too. Whenever I manage to save a bit of money, I like to get new accessories for my bike. I've bought reflectors, new handle bar grips, a bicycle pump, and a water bottle. As soon as I save enough money, I'm going to buy a Cateye Cycle Computer that calculates distance and speed.

I love riding and exploring new neighborhoods. Riding helps me clear my head and forget about my worries. It's great exercise, too. Of course, I'm careful when I ride in traffic and I always wear a helmet.

-  C. Write about some of your most important possessions. Say how long you've had them and why they are special. Remember to use appropriate pronouns to link sentences.

12 Form, Meaning and Function

The Passive

We use the passive to emphasize the *action* and not *who* or *what* does it. To make the passive, we use the verb *be* and a past participle.*

Simple Present: Millions of people use the Internet. (active)
The Internet **is used** by millions of people. (passive)

Present Perfect: Technology has changed our lives. (active)
Our lives **have been changed** by technology. (passive)

Simple Past: Alexander Graham Bell invented the telephone. (active)
The telephone **was invented** by Alexander Graham Bell. (passive)

The person or thing that does the action is the *agent*. When we want to show the agent, we use *by* + the agent. When the agent is not necessary, we leave it out.

A thief stole my bike.

My bike **was stolen**. (*by a thief* is not necessary)

Someone has broken the window.

The window **has been broken**. (*by someone* is not necessary)

The boys broke the window.

The window **was broken** *by the boys*. (necessary)

1 Listen and Discuss

What do you think people mean when they say a town or neighborhood has a good quality of life?

Do You Know Where This Place Is?

Look at each photo, read the text, and guess the name of the city or country. In what ways is it similar to or different from where you live?

◀ The public transportation system is the most efficient in the world. The bullet trains can travel at 186 miles (300 kilometers) per hour and are extremely punctual. Fares for the express trains are as expensive as airplane fares, but overall, the time required for the train trip is usually shorter, since there is no need to travel to an airport.

▶ The city is known to be one of the safest cities in the world. The overall crime rate is roughly the same as that of Singapore, but lower than that of Tokyo, Toronto, and many other large cities.

◀ It is home to one of the oldest universities in the world and one of the largest. Nowadays, the town isn't as quiet as it used to be, but the quality of life is still just as good. There are lots of green areas, and a quarter of the population cycles around the town: over the bridges, through the parks, and along the narrow streets.

Before Reading

What do you know about twins? Have you ever met any?

You Look Just Like Me!

“Hi, Eddy. We’re going to be in math class together again this semester, aren’t we?”
“Sorry. I’m not Eddy.”

“Nice to see you again, Bobby.”
“Sorry. I don’t know you.”
“You’re Bobby, aren’t you?”
“No, I am not. I’m Eddy.”

This is the story of an amazing coincidence. Three brothers—triplets—met for the first time at the age of 19.

Bobby Shafran started a new semester at Sullivan Community College in New York. The previous semester Eddy Galland was a student there. The two teens looked exactly alike. Another student confused Bobby with Eddy, and then he realized that the boys were probably brothers. That student introduced Bobby to Eddy. The two boys found out that they were in fact twins, born at the same time. The boys were orphans and grew up in two different families. The families didn’t know that their baby boys had brothers. But even more amazing was this. After the story was in the newspapers, another boy, named David Kellman, realized that he was their brother, too—also born at the same time. So, the twins became triplets!

There are many touching stories of orphans who meet for the first time as adults. Another well-known story of twins is that of Daphne Goodship and Barbara Herbert. They met for the first time at the age of 39. When they met, each was wearing a beige dress and a brown jacket. Blue was their favorite color. They both liked their coffee cold and black. Well, perhaps, that isn’t very surprising, is it? But how about these similarities? They both fell down some stairs at the age of 15, and later they had problems with their ankles. They both used the same recipe book and sometimes cooked the same meal on the same day. And to scientists who studied them, they had similar personalities: they were talkative, and they laughed a lot. Because of this, they were called the “Giggle” twins.

Scientists like to study such cases of twins. They want to answer the classic question, “What’s more important—heredity or environment?” Studies with twins like the Giggle twins seem to make a case for heredity, don’t they? The twins grew up in different environments, but still the twins are very similar in many ways. But are all the similarities just coincidences? What do you think?

After Reading

A. Answer the questions about the reading.

1. How did Bobby and Eddy first meet?
2. What happened when one brother read the newspaper?
3. How were the Giggle twins similar?
4. Why were they called the Giggle twins?

B. Match the following words in the reading with their definitions.

- | | |
|--------------------|--|
| 1. ___ coincidence | a. three children born at the same time |
| 2. ___ confuse | b. think wrongly that a person is someone else |
| 3. ___ orphan | c. a situation in which two things happen together by chance |
| 4. ___ heredity | d. a child who has lost his parents |
| 5. ___ triplets | e. what you get from your parents |
| 6. ___ touching | f. having a strong emotional effect |

C. Role-play an interview with one set of twins/triplets in the article. Work in small groups, and take turns being “twins” or “triplets” and interviewers. Present your interviews to the class.

Discussion

1. What do you think that cases like the Giggle twins show?

9 Reading

Before Reading

1. On which side of the road do people drive in your country?
2. On which side of the road do people usually walk?

Is Right, Right?

Why must you drive on the right side of the road in some countries and on the left side of the road in other countries? Investigate the question, and you find a lot of confusion on right versus left. About a quarter of the world drives on the left, and most of those countries used to be British colonies. In England people drive on the left, but on escalators they stand on the right, so that people who are in a hurry can go up on the left. In Japan, they drive on the left, too, but people usually stand on the left on escalators.

There are different explanations for the use of right versus left. Some people believe that it is a natural tendency to walk or drive on the right. This is because most people are right-handed.

We can look back in history for reasons people move on the right or left of the road. Some people say that in Europe hundreds of years ago, people rode their horses on the left. This way, their sword was between them and anyone who was coming toward them in the opposite direction. They were ready to pull out their sword and fight to defend themselves with their right arm. There is also evidence that ancient Greek, Egyptian, and Roman troops used to march on the left side. And in Rome, they made it a law in the 1300s. So when and why did the right side become popular?

One idea is that in the 1700s, people in France and in the United States started to use

wagons with several pairs of horses and to drive on the right side of the road. It was easier for the drivers to sit on the left and control the horses with a whip in the right hand, and it was safer if other vehicles passed on the left so the drivers could see the distance between vehicles. Some people say that in England, people always drove on the left, and in France, people always drove on the right.

In any case, Napoleon, a ruler of France, ordered people to drive on the right side in the early 1800s. France conquered many countries at that time, and so these countries drove on the right. But France didn't conquer England, so England kept its custom of driving on the left.

In the twentieth century, there was a trend to the right. Many cars were made in the United States, and they were made for driving on the right side of the road. As recently as 1967, Sweden changed its laws. Now people in Sweden must drive on the right.

So right or left? Just follow the customs of the country where you are—and be sure to drive carefully on that side!

Comments from customers about their experience

◀ The instructor told me to stand up and walk toward the exit door. I thought, “What if my parachute doesn’t open?” I’ve never been so frightened in my life. My camera operator was ready. I couldn’t back out now. So I let myself go out the plane. Those were the most exciting and enjoyable seconds that I have ever experienced. I saw the ground getting closer and closer, and I heard the wind rushing by. I checked my altimeter and pulled the ripcord of my parachute. There was a strong jerk. Suddenly it was calm, and I watched the beautiful landscape below as I floated peacefully to the landing area.

Mitch Taylor

I’ve ridden cross-country for several years, but this was my first cycling tour—and I’m looking forward to the next one. It was spring, there was still some snow on the slopes, and the countryside was green and full of wildflowers. I could smell the fresh scent of the plants in the air when the breeze blew against my face. Biking is much more fun than being stuck inside a car or on a tour bus. I love to be in contact with nature and hear all the sounds: the birds, the trees, the water in the streams. Going uphill can be tiring sometimes, but the views are worth the effort.

Daniel Garcia

◀ At first, I was scared, but after a while, I got used to going up and down. The bumps, spins, and shakes were the least of my worries. I’ve gone to amusement parks since I was a kid, but this was a different matter. It was the real thing, and it was up to us to control the experience and stay safe. I paddled to get away from the rocks, and heard the sound of the boat hitting the water. It splashed up inside the boat, and I got completely soaked. But I wasn’t worried about the freezing water. My objective was to get to the end of the journey safely. It was a great feeling of accomplishment when it was over.

H READING

Since the 1700s, people have tried many different ways of traveling over land. They wanted to move more quickly and more comfortably than they could on horseback. Inventors have produced several different kinds of car engines since 1760. First, they tried steam engines. But they were noisy, and the driver had to stop frequently to get more water. Then they tried gasoline engines. The inventor of the modern gasoline-powered automobiles was a German named Karl Benz. He made his first car in 1886. His company later became Mercedes Benz, and it is still making cars today.

Automobile companies have added many improvements to cars over the years. Have you been in a car in rainy or snowy weather? Was it difficult to see the other cars on the road? A hundred years ago, it was almost impossible to drive in bad weather. People had to get out of their cars and wipe the windshields of their cars every few minutes. However, today, we have

windshield wipers. M. Anderson invented the windshield wiper in 1903, and by 1913 almost all American cars had them. And today you can't buy a car without them.

Another invention that has become very popular is the bucket seat. Steve McQueen, a famous American actor, invented this type of seat. McQueen worked on cars and was a race car driver. He needed a seat that was comfortable when his car was going very fast. Have you ever sat in a bucket seat? It's lower than a regular seat, and most people say it's more comfortable. Manufacturers have put bucket seats in cars for over forty years now.

Auto manufacturers have improved cars. They've added things that make driving easier and more comfortable for drivers. Windshield wipers and bucket seats were only the beginning. Now many cars have GPS devices and even computers to help drivers park. Cars have come a long way in one hundred years!

Write **T** for **True** and **F** for **False**.

1. _____ There have been cars with engines since 1760.
2. _____ The first cars had gasoline engines.
3. _____ Most American cars had windshield wipers in 1903.
4. _____ An actor invented the bucket seat.

Small Town America

Do you know what the expression “small town America” means? Sometimes people use it to describe living in a small town in the U.S.A. There’s a big difference between the quality of life in a large city and in a small town. That’s true in any country.

Some people prefer to live in the city because there are a lot of people to meet, a lot of places to eat, and a lot of things to do. The pace of life is faster in a big city than it is in a small town. So for some people, the expression “small town” or “small town America” is another way to say that something is slow or even boring.

Officially a town has to have less than 10,000 residents to be considered a small town. In other words, a small town is even smaller than a small city. Many young people who grow up in small towns leave for life in the big city. But there are those who regret their move to the big city and want to move back to their small town life. Why? Many miss the community—the friendly neighbors, the close friends, and the looking out for the other person that are often characteristic of a vibrant small town.

The top ten best small towns in the U.S.A. are voted on annually. These are the towns that people miss when they move away. These are the towns that have citizens who are excited about living in their small town. Recently, Hammondsport, New York was voted the best small town in America.

Young people in small town America often do very different things for fun than their big city counterparts. Some of the exciting things young people in small town America do include riding ATVs (all terrain vehicles), riding horses, and even riding snowmobiles when it snows!

Answer the questions.

1. What are three reasons some people like to live in a big city?

2. How many people have to live in a town for the town to be considered a small town?

3. Why do some people regret moving to the big city from a small town?

4. What is the name of the town that was recently voted as the best small town in America?

5. What are three things that young people like to do in small towns?

H READING**A Special Bond**

There is a very special bond—or tie—between identical twins. Of course, identical twins look alike. When they get older, they sometimes even have the same number of wrinkles around their eyes. Most twins also share a special bond, an amazing feeling of closeness with each other. And identical twins behave alike. For example, one pair of twins both walk into the ocean backward and only up to their knees.

For John and William Bloomfield, the special bond went beyond life. The Bloomfield twins did everything together. One night they were eating dinner together at a restaurant. John—or perhaps it was William—had a heart attack and died. His brother immediately had a heart attack and died, too. The medics couldn't save either brother, or even figure out who was John and who was William.

California twins Ronald and Donald Anderson shared a single life. Everyone thought there was only one Mr. Anderson. One day Ronald Anderson robbed a bank. The police were sure that Ronald Anderson was the thief. They saw him running away. There was one problem: When the bank was robbed, Ronald Anderson was already in jail. If he was in jail, he was not the thief. The police were confused. Finally, they found the answer. There were two Anderson brothers—twins! For many years, they pretended to be one person. *Donald* Anderson was in jail. *Ronald* Anderson robbed the bank. Now Ronald Anderson is in jail, too.

Answer the questions.

1. What is the special bond between twins?
