I. Reading Comprehension (1 mark each)

/ 6

Read the following text, and then answer the questions below:

With the advancement in technology, people can now do various things at the comfort of their homes, and one of those things is electronic shopping which was invented by an English inventor named Michael Aldrich in 1979. Electronic shopping allows people to buy things online without actually going to physical stores. The internet allows people to order everything from clothes to shoes to smart phones to appliances.

Online shopping is the best option for people who do not have much time and are busy. It is a convenient way for people who

can't handle crowded places and malls to shop, so they can order anything at any time from home. By browsing different shopping store websites or mobile phone applications e.g. Amazon, IKEA, Noon, SACO, eXtra and Jarir Book Store, you can choose the product according to your needs and make an online payment through your debit or credit card.

However, there are some websites that are fake and provide you with great offers to tempt you and trick you at the end. In order to avoid being cheated later on, you should do online shopping carefully and wisely.

1) **The best title for the text would be:**

- a) Physical Shopping Stores

In modern times , people have communicated by letter , telegraph and telephone .But no one method has become as widespread as quickly as the use of email . The first email message took place in 1971, and according to its sender , Ray Tomlinson ,it was probbaly the following : "QWERTYUIOP". What was significant about that ? Nothing , really . This is just the top row of keys on an English-language keyboard . Tomlinson was just testing out the system and using a nonsensense message . He had no concept that he was going to start a revolution in communication . Tomlinson was one of a group of scientists who were working on developing better computers. Scientists at his site were able to send a message to a “mailbox” on the computer on their site. Other scientists could view the messages in the mailbox. But there were other computers at other sites where scientists were working on the same project. Tomlinson’s idea was to gure out a way to deliver messages to mailboxes on those remote computers. He used the @ sign to identify messages that were headed out of the local machine to the more distant ones. That was the start of the emailing systems that we still use today.
